## Flash Card & Study Apps at Glance

### Flashcards by NKO

This Flashcard app is as easy to use as it is fun. The app features many games, quiz, and study modes with badges and leaderboard. Text and audio can be added, plenty of cards exist for download, and subscriptions are available for teachers and educators which can allow up to 250 users. This app uses a spaced repetition system and gamification as incentive and allows users to set reminders to study.

### Brainscape

This app is easy to use and allows the addition of photos and sound through the Advanced Editor on the Brainscape website. Cards are easy to add, design, edit, and download. The app uses confidence based repetition and spaced repetition techniques. This app allows users to set reminders to study.

### Flashcards+ Chegg

This is a nice basic Flashcard app that is easy to use and doesn't have a lot of bells and whistles. Creating and downloading decks is easy and users can add image files to their decks.
