

## Storage Apps at Glance

**Dropbox** is a cloud storage service which allows you to have access to your files on any device. Share and collaborate easily and never have to worry about emailing yourself a copy of your important document or losing your files ever again. This service provides 2GB of free storage and users may earn added storage by inviting friends or by signing up for a monthly subscription.

**OneDrive** is a cloud storage service which allows you to access your files on any device. Share and collaborate files and never have to worry about emailing yourself a copy or losing your files ever again. This service provides 5GB of storage free and monthly subscriptions are available should you require more space.

**GoogleDrive** is a cloud storage service which allows you to access your files on any device. Share and collaborate easily and never have to worry about emailing yourself a copy or losing your files ever again. This service provides 15 GB of storage for free and monthly subscriptions are available should you require more space. St. Thomas University students already have access to this service and may sign in using their STU e-mail address and password.
